(54) CARD TYPE MULTI-FUNCTIONAL TELEPHONE TERMINAL SYSTEM

(57)Abstract:

PURPOSE: To use one set of telephone terminal as a multi-functional telephone terminal having various functions by storing a program realizing various functions in a memory card and providing a switch for the selection to the same memory card.

CONSTITUTION: Plural programs realizing various functions of a multi-functional telephone set 1 are stored in a memory section 11 of a memory card 4 and a rubber switch 5 selecting each program is provided on the upper face. Then a name of a corresponding function is printed out near each switch 5. When a memory card 4 is loaded to a memory card loading port 2, an insertion signal is sent to a central controller 6 via a card reader 8 and the control program monitors the switch depression. When the rubber switch 5 is depressed, the control program reads a relevant program from the memory card 4 to be loaded via the card reader 8 and starts the said program.
